SUBJECT and TITLE INDEX

SPE TRANSACTIONS
VOLUME 4
1964

Ablation

Phosphorus-Containing Phenolic Resins, Kindley, L. M., Filipescu, N., Pappas, E., and Huether, C., *April, p. 139.*

Acrylics

Dielectric Measurements Elucidate Structure in Acrylic Polymers, Steck, Naomi S., *Jan., p. 34.*

A New Second-Order Transition Temperature Relationship for Copolymers, Bartoe, W. F., Steck, N. S. and Dyvik, G. K., *April, p. 98.*

Biodeterioration

Biodeterioration of Plastics, Wessel, C. J., *July, p. 193.*

Cellulose Acetate Butyrate

Nonlinear Viscoelastic Behavior of Cellulose Acetate Butyrate, Sharma, Dr. M. G. & Wen, P. R., *Oct., p. 282.*

Chemical Structure

The Relationship Between Chemical Structure and Properties of Polyester Resins, Hayes, B. T., *April, p. 90.*

Crystallinity

Mechanical and Dielectric Relaxation of Crystalline Polymers in Relation to Degree of Crystallinity and Morphology, Passaglia, E., *July, p. 169.*

The Relationship Between Crystallization and Deformation Processes in High Polymers, Lindenmeyer, P. H., *July, p. 157.*

Structural Interpretations of Mechanical Properties of Polycrystalline Polymers, Stein, R. S., *July, p. 178.*

Theoretical Aspects of the Morphology of Solution Grown Polymer Crystals, Price, F. P., *July, p. 151.*

Theoretical Aspects of Polymer Morphology Crystallization with Chain Folds: Bulk Polymers, Hoffman, J. D., *Oct., p. 315.*

The Transparency of Crystalline Polymers, Pritchard, Ruth, *Jan., p. 66.*

Degradation

Degradation of Polymeric Compositions in Vacuum to 10^{-5} mm Hg in Evaporation and Sliding Friction Experiments, Buckley, D. H., and Johnson, R. L., *Oct., p. 306.*

Thermal and Oxidative Degradation of Polymers, Hawkins, W. L., *July, p. 187.*

Dielectric Measurements

Dielectric Measurements Elucidate Structure in Acrylic Polymers, Steck, Naomi S., *Jan., p. 34.*

Education

Editorial—How Much Do We Know? Flory, P. J., *Jan., p. 5.*

Editorial—How We May Know More, Kaufman, H. S., *April, p. 77.*

Epoxy

The Effect of Glass Surface Chemistry on Glass-Epoxy Systems, Laird, J. A., and Nelson, F. W., *April, p. 120.*

Extrusion

Screw Extrusion—Flow Patterns and Recent Theoretical Developments, Squires, P. H., *Jan., p. 7.*

Study on Flow Property of Polymer Melt with the Screw Extruder, Ui, J., Ishimaru, Y., Murakami, H., and Fukushima, N., *Oct., p. 295.*

Filament Winding

The Influence of Filament Orientation on the Material Properties of Reinforced Plastics, Shaffer, B. W., *Oct., p. 267.*

Structural Characteristics and Optimization of Filament-Wound Cylindrical Rocket Motor Cases, Foerster, A. F., and Boller, T. J., *April, p. 102.*

Fireproofing

Fireproofing of Polymers and Derivatives of Phosphines and with Halogen-Phosphorus Compounds, Boyer, N. E., and Vajda, A. E., *Jan., p. 45.*

Flame Resistance

Fireproofing of Polymers and Derivatives of Phosphines and with Halogen-Phosphorus Compounds, Boyer, N. E., and Vajda, A. E., *Jan., p. 45.*

Flame-Resistant Rigid Polyurethane Foams from Monobrominated Toluene Diisocyanate, Deanin, Dr. R. D., Nametz, R. C., and Lambert, P. M., *Oct., p. 251.*

Dielectric Measurements

Dielectric Measurements Elucidate Structure in Acrylic Polymers, Steck, Naomi S., *Jan., p. 34.*

Education

Editorial—How Much Do We Know? Flory, P. J., *Jan., p. 5.*

Editorial—How We May Know More, Kaufman, H. S., *April, p. 77.*

Epoxy

The Effect of Glass Surface Chemistry on Glass-Epoxy Systems, Laird, J. A., and Nelson, F. W., *April, p. 120.*

Extrusion

Screw Extrusion—Flow Patterns and Recent Theoretical Developments, Squires, P. H., *Jan., p. 7.*

Study on Flow Property of Polymer Melt with the Screw Extruder, Ui, J., Ishimaru, Y., Murakami, H., and Fukushima, N., *Oct., p. 295.*

Filament Winding

The Influence of Filament Orientation on the Material Properties of Reinforced Plastics, Shaffer, B. W., *Oct., p. 267.*

Structural Characteristics and Optimization of Filament-Wound Cylindrical Rocket Motor Cases, Foerster, A. F., and Boller, T. J., *April, p. 102.*

Fireproofing

Fireproofing of Polymers and Derivatives of Phosphines and with Halogen-Phosphorus Compounds, Boyer, N. E., and Vajda, A. E., *Jan., p. 45.*

Flame Resistance

Fireproofing of Polymers and Derivatives of Phosphines and with Halogen-Phosphorus Compounds, Boyer, N. E., and Vajda, A. E., *Jan., p. 45.*

Flame-Resistant Rigid Polyurethane Foams from Monobrominated Toluene Diisocyanate, Deanin, Dr. R. D., Nametz, R. C., and Lambert, P. M., *Oct., p. 251.*

Flow Patterns

Screw Extrusion—Flow Patterns and Recent Theoretical Developments, Squires, P. H., *Jan., p. 7.*

Study on Flow Properties of Polymer Melt with the Screw Extruder, Ui, J., Ishimaru, Y., Murakami, H., and Fukushima, N., *Oct., p. 295.*

Fluoropolymers

Mechanical and Dielectric Relaxation of Crystalline Polymers in Relation to Degree of Crystallinity and Morphology, Passaglia, E., *July, p. 169.*

Pyrolysis of New Fluoropolymers, Straus, S., and Wall, L. A., *Jan., p. 56.*

Pyrolysis of Polytrifluoroethylene: Influence of Gamma Radiation and Alkali Treatment, Straus, S., and Wall, L. A., *Jan., p. 61.*

Fracture

The Criterion of Fracture, Bikerman, J. J., *Oct., p. 290.*

Glass Surface Chemistry

The Effect of Glass Surface Chemistry on Glass-Epoxy Systems, Laird, J. A., and Nelson, F. W., *April, p. 120.*

Studies of the Thicknesses of Adsorbed Glass Finishes by Ellipsometry, Stromberg, R. R., Tutas, D. J., and Passaglia, E., *Oct., p. 256.*

Glass Transition Temperature

A New Second-Order Transition Temperature Relationship for Copolymers, Bartoe, W. F., Steck, N. S., and Dyvik, G. K., *April, p. 98.*

Injection Molding

Structure—Property Modifications by Fabrication Operations, Maxwell, B., Gogos, C. G., Blyler, L. L. Jr., and Mineo, R. M., *July, p. 165.*

Interference Microscopy

The Interference Microscopy of Crystalline Linear High Polymers, Wunderlich, B., and Sullivan, P., *April, p. 113.*

Linear High Polymers

The Interference Microscopy of Crystalline Linear High Polymers, Wunderlich, B., and Sullivan, P., *April, p. 113*

Molecular Weight Distribution

Properties of High Density Polyethylene with Bimodal Molecular Weight Distribution, Zabusky, H. H., and Heitmiller, R. F., *Jan., p. 17.*

Morphology

Mechanical and Dielectric Relaxation of Crystalline Polymers in Relation to Degree of Crystallinity and Morphology, Passaglia, E., *July, p. 169.*

The Interference Microscopy of Crystalline Linear High Polymers, Wunderlich, B., and Sullivan, P., *April, p. 113.*

The Quenched State of Polypropylene, Gailey, J. A., and Ralston, R. H., *Jan., p. 29.*

The Relationship Between Crystallization and Deformation Processes in High Polymers, Lindenmeyer, P. H., *July, p. 157.*

Structural Interpretations of Mechanical Properties of Polycrystalline Polymers, Stein, R. S., *July, p. 178.*

Structure—Property Modifications by Fabrication Operations, Maxwell, B., Gogos, C. G., Blyler, L. L. Jr., and Mineo, R. M., *July, p. 165.*

Theoretical Aspects of the Morphology of Solution Grown Polymer Crystals, Price, F. P., *July, p. 151.*

Theoretical Aspects of Polymer Morphology Crystallization with Chain Folds: Bulk Polymers, Hoffman, J. D., *Oct., p. 315.*

Naturally Occurring Thermoplastic

Poly-β-Hydroxybutyric Acid—A Naturally Occurring Thermoplastic Material, Werber, F. X., and Baptist, J. N., *Oct., p. 245.*

Oscillating Shear Phenomenon

The Oscillating Shear Phenomenon in High Density Polyethylenes, Metzger, A. P., and Hamilton, C. W., *April, p. 107.*

Oxidation

Oxygen Absorption Studies on Polypropylene, Bell, G. W. Jr., and Heyd, C. E., *Jan., p. 39.*

Thermal and Oxidative Degradation of Polymers, Hawkins, W. L., *July, p. 187.*

Phenolic Resins

Phosphorus-Containing Phenolic Resins, Kindley, L. M., Filipescu, N., Pappas, E., and Heuther, C., *April, p. 139.*

Poly-β-Hydroxybutyric Acid

Poly-β-Hydroxybutyric Acid—A Naturally Occurring Thermoplastic Material, Werber, F. X., and Baptist, J. N., *Oct., p. 245.*

Polyester Resins

The Relationship Between Chemical Structure and Properties of Polyester Resins, Hayes, B. T., *April, p. 90.*

The Oscillating Shear Phenomenon in High Density Polyethylenes, Metzger, A. P., and Hamilton, C. W., *April, p. 107.*

Polyethylene

Properties of High Density Polyethylene with Bimodal Molecular Weight Distribution, Zabusky, H. H., and Heitmiller, R. F., *Jan., p. 17.*

The Relationship Between Crystallization and Deformation Processes in High Polymers, Lindenmeyer, P. H., *July, p. 157.*

Polyethylene

Theoretical Aspects of the Morphology of Solution Grown Polymer Crystals, Price, F. P., *July, p. 151.*

Why Do Plastics Stress-Crack?, Howard, J. B., *July, p. 217.*

Polyolefins

Mechanical and Dielectric Relaxation of Crystalline Polymers in Relation to Degree of Crystallinity and Morphology, Passaglia, E., *July, p. 169.*

Structure–Property Modifications by Fabrication Operations, Maxwell, B., Gogos, C. G., Blyler, L. L. Jr., and Mineo, R. M., *July, p. 165.*

Thermal and Oxidative Degradation of Polymers, Hawkins, W. L., *July, p. 187.*

The Transparency of Crystalline Polymers, Pritchard, Ruth, *Jan., p. 66.*

Polypropylene

Oxygen Absorption Studies on Polypropylene, Bell, G. W. Jr., and Heyd, C. E., *Jan., p. 39.*

The Quenched State of Polypropylene, Gailey, J. A., and Ralston, R. H., *Jan., p. 29.*

Polymerization

Vinyl Chloride/Bicyclo (2.2.1)Hepta-2, 5-Diene Copolymers: High Softening, Easily Processed Vinyl Resins, Zutty, N. L., and Whitworth, C. J., *Jan., p. 22.*

Polyurethane Foams

Flame-Resistant Rigid Polyurethane Foams from Monobrominated Toluene Diisocyanate, Deanin, R. D., Nametz, R. C., and Lambert, P. M., *Oct., p. 251.*

Properties

Mechanical and Dielectric Relaxation of Crystalline Polymers in Relation to Degree of Crystallinity and Morphology, Passaglia, E., *July, p. 169.*

Properties of High Density Polyethylene with Bimodal Molecular Weight Distribution, Zabusky, H. H., and Heitmiller, R. F., *Jan., p. 17.*

The ADL Ball Rebound Tester, Raphael, T., and Armeniades, C. D., *April, p. 83.*

The Relationship Between Chemical Structure and Properties of Polyester Resins, Hayes, B. T., *April, p. 90.*

Structural Interpretations of Mechanical Properties of Polycrystalline Polymers, Stein, R. S., *July, p. 178.*

Tensile Impact Properties of Thermoplastics, Simpson, E. H., and Polleck, R. E., *Jan., p. 25.*

Vinyl Chloride/Bicyclo (2.2.1)Hepta-2, 5-Diene Copolymers: High Softening, Easily Processed Vinyl Resins, Zutty, N. L., and Whitworth, C. J., *Jan., p. 22.*

Pyrolysis

Pyrolysis of New Fluoropolymers, Straus, S., and Wall, L. A., *Jan., p. 56.*

Pyrolysis of Polytrifluoroethylene: Influence of Gamma Radiation and Alkali Treatment, Straus, S., and Wall, L. A., *Jan., p. 61.*

Quenching

The Quenched State of Polypropylene, Gailey, J. A., and Ralston, R. H., *Jan., p. 29.*

Reinforced Plastics

Glass Cloth Improved Laminates, Oswald, R. C., *Oct., p. 263.*

The Effect of Glass Surface Chemistry on Glass-Epoxy Systems, Laird, J. A., and Nelson, F. W., *April, p. 120.*

The Influence of Filament Orientation on the Material Properties of Reinforced Plastics, Shaffer, B. W., *Oct., p. 267.*

Studies of the Thicknesses of Adsorbed Glass Finishes by Ellipsometry, Stromberg, R. R., Tutas, D. J., and Passaglia, E., *Oct., p. 256.*

Research

Editorial–Some Aspects of Industrial Polymer Research, Frank, H. P., *July, p. 149.*

Rheology

Concentration of Extrudate Swelling Measurements for Polymer Solutions by a Reduced-Concentration Technique, Middleman, S., *April, p. 79.*

Nonlinear Viscoelastic Behavior of Cellulose Acetate Butyrate, Sharma, M. G., and Wen, P. R., *Oct., p. 282.*

Rheological Properties of Polyvinyl Chloride: Parts I, II and III, Sieglaff, C. L., *April, p. 129.*

The Correlation of the Non-Newtonian Flow of Polymeric Melts with the Theories of Bueche, Brodnyan, J. G., Shoulberg, R. H., and Kelley, E. L., *Oct., p. 277.*

The Oscillating Shear Phenomenon in High Density Polyethylenes, Metzger, A. P., and Hamilton, C. W., *April, p. 107.*

Structural Applications

On Aging of Plastics in Structural Applications, Ingle, G. W., *July, p. 224.*

Structural Characteristics

Structural Characteristics and Optimization of Filament-Wound Cylindrical Rocket Motor Cases, Foerster, A. F., and Boller, T. J., *April, p. 102.*

Structure

Dielectric Measurements Elucidate Structure in Acrylic Polymers, Steck, Naomi S., *Jan., p. 34.*

Stress-Cracking

Why Do Plastics Stress-Crack?, Howard, J. B., *July, p. 217*

Testing

The ADL Ball Rebound Tester, Raphael, T., and Armeniades, C. D., *April, p. 83.*

A New Second-Order Transition Temperature Relationship for Copolymers, Bartoe, W. F., Steck, N. S., and Dyvik, G. K., *April, p. 98.*

Textile Fibers

Time Effects on Textile Fibers, Hamburger, W. J., *July, p. 208.*

Time Dependent Effects

Biodeterioration of Plastics, Wessel, C. J., *July, p. 193.*

Fifteen Years of Weathering Results, Rugger, G. R., *July, p. 236.*

On Aging of Plastics in Structural Applications, Ingle, G. W., *July, p. 224.*

Thermal and Oxidation Degradation of Polymers, Hawkins, W. L., *July, p. 187.*

Time Effects on Textile Fibers, Hamburger, W. J., *July, p. 208.*

Weathering of Plastics, Kinmonth, R. A. Jr., *July, p. 229.*

Why Do Plastics Stress-Crack?, Howard, J. B., *July, p. 217.*

Thermoplastics

Fifteen Years of Weathering Results, Rugger, G. R., *July, p. 236.*

Tensile Impact Properties of Thermoplastics, Simpson, E. H., and Polleck, R. E., *Jan., p. 25.*

The ADL Ball Rebound Tester, Raphael, T., and Armeniades, C. D., *April, p. 83.*

Thermosets

The ADL Ball Rebound Tester, Raphael, T., and Armeniades, C. D., *April, p. 83.*

Fifteen Years of Weathering Results, Rugger, G. R., *July, p. 236.*

Transparency

The Transparency of Crystalline Polymers, Pritchard, Ruth, *Jan., p. 66.*

Vinyl Resins

Rheological Properties of Polyvinyl Chloride: Parts I, II III, Sieglaff, C. L., *April, p. 129.*

Vinyl Chloride/Bicyclo (2.2.1)Hepta-2, 5-Diene Copolymers: High Softening, Easily Processed Vinyl Resins, Zutty, N. L., and Whitworth, C.J., *Jan., p. 22.*

Vacuum

Degradation of Polymeric Compositions in Vacuum to 10^{-9} mm Hg in Evaporation and Sliding Friction Experiments, Buckley, D. H., and Johnson, R. L., *Oct., p. 306.*

Weathering

Fifteen Years of Weathering Results, Rugger, G. R., *July, p. 236.*

Weathering of Plastics, Kinmonth, R. A. Jr., *July, p. 229.*
